Profile

I am a Manual QA with a background in market research, two years of crowd testing experience, and current freelancing on a SaaS startup project. I use my eye, hands and tools like Chrome DevTools and Postman to ensure product quality and functionality.

In light of my soft skills, I mention empathy, resilience, attention to details, and assessing the product from the end-user's perspective.

Employment History

QA specialist (part-time work), Winware.ai, remote

February 2023 — Present

- Created test cases and tracked issues using Jira-Xray
