Barcelona, Spain

Two years ago I decided to switch my profile from market researcher to get into software testing.

Now I'm working as a crowdtester and I'm looking for a remote project where I can implement and extend my skills, experience and professional growth in QA.

It's always interesting to investigate something.

WORK EXPERIENCE IN SOFTWARE TESTING

Testbirds testbirds.com - Crowdtester

January, 2021 - present

Web and mobile apps testing

Tasks:
- UI, UX testing
- Functional testing
- Use cases testing
- Cross browser testing
- Bug reports

Yandex Practicum - QA Engineer (student)

May 2022 - September 2022

- fulfilled four training projects (web/mobile testing, frontend/backend testing)

Tasks:
- used EP, BVA, PW, S&T techniques
- created check-lists, test-cases, bug reports
- used Charles и Chrome DevTools (JS errors, checking if a page is implemented by design, errors localization, XSS checking, throttling, overrides etc)
- fulfilled mobile testing with Android Studio
- performed API testing with Postman (CRUD requests, collections running)
- used Terminal to connect to remote server via SSH
- connected to database and used PostgreSQL for testing

OTHER EXPERIENCE

- **GfK-Russia, GfK.com (international market research company)**
  Senior Researcher/Research Project Manager (Healthcare market research)
  October 2007 – February 2013
  Tasks:
- Research design, timing, cost calculation
- Designing research instruments (sample, questionnaire, specifications for the field department, encoding department, data processing department)
